Non-Racialism

by

Dr. Oliver Lawrence

Non-racialism is the South African response to racism. It has roots in international struggles through merging global trends such as the United States Black Power concepts, the South American Liberation Theology, and the homegrown Black Consciousness philosophy as espoused by Steve Biko and others. Non-racialism will be assessed in the context of Critical Race Theory and Diversity training. It is very much a process of converting a philosophy to a way of life. Non-Racialism is the paradigm that replaces Apartheid.
