

Arrange a special **Leadership Retreat** for your group

# Ubuntu and Reconciliation

by

**Dr. Oliver Lawrence**

Learn examples and understandings of The South African philosophy of **Ubuntu** as a force behind Mediation. **Ubuntu** drives long-term decisions amongst neighbor and allows justice decisions to consider individual interest and group interests. This workshop will analyze the strategies and methodologies available to organizations and congregations to resolve conflict. How can we identify issues that lead to major confrontations? How do we address issues of conflict? What are the processes of mediating conflict? This workshop traces a pathway through the literature that provides us the tools to address conflict in a multi-cultural environment.

Some of the topics addressing a new kind of leadership include:

- Listening Skills
- Meeting Procedures (Roberts Rules)
- Mediation Continuum
- Maslow's Hierarchy of Needs
- CommUnity
- Role Plays

Oliver thank you for leading our retreat. Your knowledge and skill made it a very valuable experience for all of us. The ball is now in our court to demonstrate our learning.
